You will need to create a shopping website with 3 different pages.
First page:

1. On this page, you will display the items in the shop.
2. Each item will have a name, description, picture and price.
3. The items will display left to right, top to bottom.
4. If the screen is less than 400 pixels wide, it will instead display them top to bottom.
5. Clicking on an item will add it to the cart.
6. On the top right, you will have an icon for a cart.
7. The icon will have a number appear over it if there are items in the cart.
8. Clicking on the icon will open a section below it which shows the name, picture and price of each item.
9. Clicking on the icon again while the section is open, will instead close it.
10. At the bottom of the cart, there will be an option to go to checkout.

Second page:

1. In the checkout page, you should display a list of the items in the cart.
2. Below it, you should have some textboxes for the following information: First name, Last name.
3. There will also be a checkbox for if the item is a gift. If it is checked, another textbox will appear that allows you to fill the name of the person receiving the gift.
4. At the bottom of the page will be a purchase button. On clicking it should validate the form and if the form isn't valid will show an error on the invalid fields.
5. Validations are as follows: First name - at least 3 letters, last name at least 3 letters, and if the gift checkbox is checked the last field should have a space inside of it.
6. After the submission the user will be taken to a receipt page.

Third Page:

1. On the receipt page you should see the items purchased, the total sum of the purchase, the full name of the person making the purchase, and if it is a gift, you should see the recipient.
2. The fields from the form should be taken from the query string.
3. The receipt will have a link back to the shopping page. When clicking on it, you should return to the first page without items in your cart.

פרטים להגשה

כנסו לקישור של תיקיית ענן שלנו בקישור הבא –

https://drive.google.com/drive/folders/1xFIk9wHQ1vVkkkLDTESJiIdSNAL
[kIVuK?usp=sharing](https://drive.google.com/drive/folders/1xFIk9wHQ1vVkkkLDTESJiIdSNALkIVuK?usp=sharing)

1. תפתחו תיקייה עם השם שלכם ולשם תעלו את הפרויקט שלכם.
2. לעלות עבודות שלמות בקובץ zip ולא בword!
3. אם מישהו מסתבך עם להוציא פרויקט לקובץ zip שידבר איתי.
4. לכל שאלה נוספת מוזמנים לפנות אלי MatanD@Sela.co.il

מתן.
